

# Cable Drum

## Product Introduction

Cable reels are specialized reels for wires and cables. They are typically constructed of steel or steel-wood. Steel reels are sturdy, durable, provide good cable protection, and are reusable.

## Product Features

- 1. This wire reel can be manufactured according to customer requirements or in accordance with standards such as GB4004-83, JB/T8997.4-2013, and DIN46397.
- 2. This wire reel is made of stamped steel plate, ensuring high concentricity, good rigidity, durability, and resistance to deformation.
- 3. This wire reel can be customized according to customer requirements.
- 4. The wire reel can be used for cables, wires, cords, flat wires, hoses, etc.: stainless steel wire, high carbon steel wire, medium carbon steel wire, low carbon steel wire, welding wire, steel cord, steel wire rope, copper and aluminum single bundles, insulated and sheathed wires and cables.
- 5. The wire reel can be used in all wire drawing machines, such as wire drawing and rope making.
- 6. The wire reel can be used for winding or unwinding in cage stranding machines, tube stranding machines, bow stranding machines, wire bundling machines, and cable forming machines.
- 7.The wire reel can also be used as a disposable delivery reel.
