

# Fully Automatic Permanent Magnetic Lifter

## ● Product Introduction

A fully automatic permanent magnet chuck is a suction cup device that uses permanent magnet force to adhere to flat or uneven surfaces. Made of high-performance permanent magnet materials, it generates strong suction and maintains stability. Self-priming permanent magnet chucks feature self-priming and automatic release functions, requiring no external power supply or control system, making them convenient, safe, and reliable to use.

## ● Product Features

Features include simplicity, light weight, no power supply or control system required, and ease of use.

## ● Basic Parameter

Model	Rated capacity (kg)	Maximum pull-out force	Length A(mm)	Width B(mm)	Base height H(mm)	Net weight (kg)	Gross weight (kg)
HC-1T	1000	3.5 times	550	500	105	170	190
HC-2T	2000	3.5 times	650	560	115	265	280
HC-3T	3000	3.5 times	840	565	115	330	345
HC-5T	5000	3.0 times	1060	700	145	610	638
HC-10T	10000	3.0 times	1200	773	220	1266	1300
2T Extended version	2000	3.5 times	1100	400	140	305	320
3T Extended version	3000	3.5 times	1100	400	140	345	360
